AccuraScience, LLC is a bioinformatics company that provides NGS data processing, analysis and interpretation services. We serve academic research laboratories, medical facilities and third-party biotech companies. We perform all types of analysis routine and customized- that involve any types of NGS data produced from any sequencing platforms, and for any established and novel applications. We have a flexible payment schedule which includes three different tracks to meet your needs.

The company has been established and managed by a group of professional bioinformaticians, bioinformatics software developers and investors, with a mix of strong expertise in academic research, industrial development and business operation. Our NGS analysis service team is headed by seven Lead Bioinformaticians, with more than 70 years experience in bioinformatics research and development, and 25 years experience in NGS data analysis. They are supported by a team of bioinformatics engineers, IT specialists and customer support staff. Our team is dedicated to perfecting NGS analysis pipelines for all types of common and specialized applications.
