About Us:

Analog Circuit Works, Inc. provides semiconductor IP and design services, specializing in precision analog and high speed circuits with designs that optimize performance, power and area. Founded in 2009 by Dr. Bill Ellersick, Analog Circuit Works, Inc. helps its customers focus on their core competencies while enabling rapid and low-cost migration to advanced processes, raising product performance and lowering cost and power. We provide circuits that are optimized to customer needs with a particular emphasis on best in class power consumption and die area. Our advanced, low-risk design methodologies allow for rapid design and exhaustive verification of circuits that are customized to meet overall system requirements.
