About Us:

We are a leading manufacturer of raw materials and finished test platforms for the

BBI Solutions

Published on Bioscience Technology (<http://www.biosciencetechnology.com>)

in-vitro diagnostics and pharmaceutical markets. Our range of raw materials includes human antigens, antibodies, serum and plasma products and clinical chemistry enzymes. We manufacture world renowned labels for lateral flow, ELISA assay and biosensors, including our gold nanoparticles and glucose oxidase.

We can offer contract development and manufacturing services, with a core focus on gold conjugation and lateral flow test manufacture, as well as introducing novel technologies to the industry, such as the Novarum Smartphone reader.
