About Us:

About Us:

BJS Biotechnologies, Ltd.

Published on Bioscience Technology (<http://www.biosciencetechnology.com>)

Founded in 1996 by BJS Company, BJS Biotechnologies, manufacturers of xpress®, was created to create and develop ultra-high speed thermal cycling technology and apply it to PCR (Polymerase Chain Reaction) tests.

Our Technology:

The xpress® thermal cycler provides the world's fastest and most thermally uniform PCR tests. This technology uses the consumable as a resistive element within an electrical circuit to provide heating, that along with forced air cooling delivers rapid thermal cycling.
