

Sample Handling Products for Molecular and Biological Applications

Sample Handling Products for Molecular and Biological Applications

Published on Bioscience Technology (<http://www.biosciencetechnology.com>)

Omega's sample handling products feature shakes, rockers, mixers and stirrers for molecular and biological mixing applications. Thermal cyclers and chillers are devices used to facilitate temperature-sensitive reactions, chill or heat samples with Omega's Peltier chiller or thermocyclers. Homogenizers and mortars to blend, homogenize or crush samples with Omega's line of homogenizers and liquid Nitrogen cooler mortars. Omega offers shields and fume hoods that protect laboratory workers from injury with Splash Shields and proper ventilation with Fume Hoods. A full line of vacuum desiccators protect and preserve your moisture-sensitive and hygroscopic materials and supplies.
